EDUCATION

University of Nebraska at Omaha |B.S Computer Science, B.S AI
WORK EXPERIENCE

Graduation Date: Fall 2026

Mutual of Omaha

Full-Stack Software Development Intern

May 2025 – Aug 2025

- Developed and optimized scalable full-stack features on life insurance platforms using Laravel, Vue.js, and PHP, directly improving performance for thousands of daily senior users and supporting 19M+ customers. Using the Agile methodologies.
- Migrated a Laravel ratings/reviews service from BazaarVoice to Yext proxy API by refactoring controllers/models, implementing contract-driven fetch methods with caching, and adding unit tests to ensure system reliability and scalability.
- Converted large media assets from JPG to WebP to improve load times and resource efficiency.

Take2

Full-Stack Software Development Start Up Intern

Dec 2024 – Mar 2025

- Co developed and launched a cross platform, real time movie-tracking app with React Native(+Node.js), TypeScript, and Firebase, serving 3,000+ iOS users.
- Designed and implemented 10+ responsive UI components and optimized backend endpoints for a 30% performance boost (per analytics).
- Triaged and fixed 20+ pre release bugs; added bulk import, notification tracking, and real time update features to ensure a smooth, on time launch.

PROJECTS

Web Development Project -Stock Watchlist Web App

Jan 2024-Present

- Designed and developed a real-time stock tracking platform with React and Flask, integrating WebSockets for live price updates, 5+ financial APIs (Yahoo Finance, Alpaca, Finnhub), Firebase Authentication, and Google Gemini AI for context-aware investment analysis and advisory chat.

Automated Trading Webhook- Rust

Jan 2026-Present

- Built a high-performance async webhook server in Rust with Axum to automate stock trading by bridging TradingView strategy alerts to the Alpaca Markets REST API, implementing structured logging with tracing, secure API key management, and paper/live trading support as a single compiled binary.

Leadership & Extracurriculars

DLR Group – AI Formatting Tool (Jan 2025 – May 2025): Developed a Python/Pandas AI tool with Azure OpenAI, cutting processing time 99% with <1% error for global scheduling datasets.

Food Pantry (Volunteer, University of Nebraska Omaha:Ongoing): Supported pantry operations by cleaning, organizing, and assisting community members in need, contributing to an efficient service environment.

Keep Omaha Beautiful – Tree Planting Initiative (Dec 2021 – May 2022): Spearheaded a six month project with classmates to plant 30+ trees across Omaha, promote biodiversity, and create an educational YouTube tutorial on proper tree planting and care.

TECHNICAL SKILLS

Languages: JavaScript, TypeScript, Python, C, HTML5, CSS3, Rust

Frameworks & Libraries: React, React Native, Flask, JupyterNotebooks, Pandas, WebSockets / Socket.IO

Databases: PostgreSQL, MongoDB, Firebase

Tools & Platforms: Google Cloud Platform, Git, Docker, CI/CD, Postman, Linux, Xcode, Jira.
